

Anti-ligature Series

Product ref: ANTWH250BB

FULL PRODUCT DESCRIPTION: Anti-ligature pull handle bolted back to back

MATERIAL: Extruded anodised aluminium or stainless steel

DESIGN SPECIFICATION: For use in premises where distressed or vulnerable patients might attempt to self harm by attaching ligatures to door hardware. The unique design prevents ligatures being attached and used upwards or downwards. Available in an extensive range of sizes up to 2100mm long.

PARTS LIST: Pair of anti-ligature pull handles and a pair of anti-tamper bolts + tool.

FITTING INSTRUCTIONS: Drill two holes 6.5mm dia x 180mm c/c. Present the handles to the door and bolt them together using the tool provided.

TROUBLE SHOOTING: Handles are not straight on the door – check holes are in line. Cannot fix to handle on opposite side of the door – holes drilled at an angle through the door. For product support telephone 01299 827837.

CARE AND MAINTAINENCE: Periodically check tightness of bolts with the tool provided and clean handles with warm soapy water do not use abrasive polishes as this will scratch the fine finish which is silver anodised.

TOUCHCLEAN ANTIBACTERIAL COATING: All Dortrend products can be supplied with our anti bacterial coating which kills 99.9% of MRSA E.Coli and other bacteria.

Dortrend International Ltd retains the right to change design features of its products without notice if the product featured varies from the above please contact us for an updated product information sheet. Thank you for purchasing our product
