

# Anti-ligature Series

**Product ref:** euro-profile escutcheons 63x10mm back to back

**FULL PRODUCT DESCRIPTION:** Anti-ligature euro-profile escutcheons 63x10mm fixed back to back.

**MATERIAL:** AISI 304 satin stainless steel

**DESIGN SPECIFICATION:** Designed for use in facilities where users of the building might self harm by attaching ligatures to door fittings. They are chamfered at the edges so that anything tied round the escutcheon falls off. The thickness of the escutcheons means the cylinder does not protrude from the escutcheon face.

**PARTS LIST:** Pair of 63x10mm anti-ligature euro-profile escutcheons and two M3.5 x 80mm torx pin machine screws and one torx pin driver head.

**FITTING INSTRUCTIONS:** After preparing the doors by drilling two 4mm holes at 38mm centres present the face fix side of the escutcheon to the door and push the machine screws through, then present the other half of the set to the machine screws and screw in. To tighten up use the screw driver head provided. Do not use power drivers to fit this product as it will damage the screw heads.

**TROUBLE SHOOTING:** If there are any problems with the escutcheons lining up please check the lock is straight in both vertical and horizontal planes. For product support telephone 01299 827837.

**CARE AND MAINTAINENCE:** Periodically check tightness of screws with the tool provided and clean handles with warm soapy water.

**TOUCHCLEAN ANTIBACTERIAL COATING:** All Dortrend products can be supplied with our anti bacterial coating which kills 99.9% of MRSA E.Coli and other bacteria.
