

Witley suite - fittings for the less able

Although our range can be accurately described as user friendly, we have developed a suite of products specifically to assist the disabled, including extended bathroom turns which are easy to grip. Our specially extended lever handle is easy to operate with elbows, but safely returns to the door, to avoid catching clothing, particularly sleeves and pockets.

As with most of our range, we can produce special items to complement our standard fittings to help the less able, and our technical staff are always available to offer advice or review sketches / drawings of products to meet special needs.

All the items listed are available in the following finishes; **AS, PB, SSS, PSS**

Refer to page 3 for glossary of finishes.

Triple bend lever
